Editorial - A word from the owners

The story of the JUREK company begins with our father Stanislav JUREK senior - an upholstery master, who was able to manufacture almost anything. From a mattress to a tent, a backpack to sleeping bag, or complex historical furniture.

When we were three young boys our father used to take us for trips to the open countryside and to the mountains. He used to make the necessary tools for us and later he observed how we could manufacture our own tools.

At the beginning of the nineties, Stanislav JUREK senior with his son Stanislav founded an upholstery workshop. At that time, high-quality dome tents were very rare.

But we already had a lot of experience with their manufacture and use and so we came up with an idea to manufacture them.

Today we can proudly say that we have been manufacturing them for over **24** years.

Our customers have travelled with our tents through all continents and used them in all climate zones.

And when they came back they gave us valuable advice such as where to add something or what to reduce a bit, what works well or what we should improve or what was redundant and we should not focus on.

All of these experiences have been integrated into the development of our products and thanks to that you may enjoy them now as well.

Besides the tents shown in our catalogue you may also find sleeping bags, sleeping pads and other equipment necessary for an enjoyable stay in the wild.

We do not offer upholstering services any more but we follow in the footsteps of our father and manufacture high-quality products covered with life-time services.

We want to be a reliable partner for all adventurers, romantics and travellers and accompany them on their travels throughout the world. A partner that you can count on in every situation.

This is the company vision with which we begin the third decade of our existence.

Radim and Stanislav Jurek

Criteria of Choice?

JUREK

tents, sleeping bags, pads, accessories

Each product has its purpose and recommended way of use, which is necessary to take into account during the choice. For easier choice and orientation, we have divided our assortment into four basic lines. Which one is yours?

JUREK EXTREME

The line from which expeditions, incurable adventurers and experts choose. Not only can these products have a substantial influence on the success of the expedition, but they can save lives of its members as well. Products from the Extreme line are to be your safety and your home while you are on the move.

JUREK EXTREME lite

novinka

Special series of tents with ultralight flysheet which is useful for all who need to save every gram. Available only in Cedar Green.

JUREK ULTRALITE

Special series of ultralight two-layer tents.

JUREK OUTDOOR

Products in this line aim at all the lovers of mountain ranges, deserted plains and wild rivers. Quality materials and excellent utility features will make you feel relaxed and carefree while rambling through unspoiled nature.

JUREK TRAMPING

This is a basic line for outdoor activities in usual conditions. Ideal for water sports, camping and occasional hikers. Quality material ensuring comfortable sleep and low weight of all the tents are the main advantages of the products in this line.

JUREK BIVI

Special series of one-layer tents for individuals.

JUREK CAMPING

Production line for families and parties who wish to spend a romantic and trouble-free holiday with a tent, having a lot of space around.

Sleeping bags (characteristic features of JUREK sleeping bags)

Insulating fillings

Goose down (G95) – best material ever, concerning the insulating properties. Excellent fillpower and durability.

Ultra-fine PrimaLoft One microfiber (PL1) – very successful replacement of down, developed for the US Army. Thanks to the special fibre treatment, it is highly water-repellent and has minimum heat loss. Heat loss of other fillings can reach 40–60 %.

Hollowfiber (DV) – one-hollow fibre with excellent fillpower.

Fleece inner liners improve thermal properties of all sleeping bags. Available for all sleeping bag sizes.

It is no longer produced !

PAMIR G95

Very warm sleeping bag, mainly thanks to the down type, quality 95/5 (750+), and H-chamber structure.

Sleeping bag accessories

1. SLEEPING-BAG INNER LINER (MUMIE)

Made of windproof and breathable PERWITEX DWR fabric. Can be used separately.

2. SLEEPING-BAG FLEECE INNER LINER (MUMIE, DEKA)

Inner liner made of fleece fabric increases thermal comfort and protects the sleeping bag. Can be used separately.

3. MESH STORAGE STUFF-BAG

ELITE self-inflating pads

JUREK

New line of lite self-inflating ELITE pads is by 20 % lighter and has compressed volume by 40 % smaller than previous models. Insulating properties have not been affected adversely by weight reduction (reached by using horizontal channels), in comparison with older models. Both materials and production technology have undergone a significant change, which ensures higher mechanical resistance and durability. Upper fabric has a diamond (or honeycomb) non-slip Ripstop finish which prevents the sleeping bag from sliding on the pad. Before packing, each pad is carefully tested for 72 hours to exclude all leaks.

GAITERS TYPE LITE

Made of BREWATEX B810 fabric (highly breathable – 8 000 g/m²/24h, waterproof – 10 000 mm of water column). All black.

GAITERS TYPE GLACIER

Their bottom part is made of improved wear-resistant BREWATEX RS Cordura Ripstop fabric.
Sizes (height in cm): 32, 37, 42, 47, 52.

FEATURES:

- 1 Waterproof-taped seams and zip protected by flap. 2 Elastic drawcord at the top, above the ankle and at the bottom.. 3 Exchangeable tightening webbing under sole. 4 Hook for fastening to shoelace.

Accessories (multi-towels, socks and avalanche probes)

TOWELS

Practical multi-towels with excellent features. To be used for outdoor, sport and fitness activities, or at home. Special microfibres, 100-times thinner than a hair, and weaving technique give them unique quality and chamois-like touch. Anti-bacterial treatment increases substantially standard washing period. Practical, light and airy stuff-bag.

TOWELS: SUEDE

Ultrasoft, non-abrasive fabric.
Easily absorbs water.
Dries quickly
(3-times as fast as cotton towels).
Anti-bacterial.
Machine or hand washable.

	sizes	packing	weight
XS	40x35 cm	10x14 cm	40 g
S	40x70 cm	15x21 cm	75 g
M	48x90 cm	15x21 cm	105 g
L	60x100 cm	22x26 cm	140 g
XL	70x125 cm	22x26 cm	200 g

SOCKS FOR HIKING

Socks for all seasons. Excellent temperature control and perspiration transport, thanks to three-dimensional weaving throughout the sock. Heel and toe are reinforced with polypropylene fibre, which increases durability.

WALK (60 % cotton, 35 % polypropylene, 5 % elastan). Socks for longer walks or shorter hikes. Very pleasant to wear.

ALPINE (85 % Coolmax, 10 % polypropylene, 5 % elastan). Socks for extreme conditions. Coolmax high-tech fibre gives them excellent properties. Highly comfortable and convenient.

TOWELS: TERRY

It absorbs water up to 8-times its weight.
Composition: 85% polyester, 15% nylon

	sizes	packing	weight
